ANTAMEDIA

Software Solutions

ANTAMEDIA is a privately held company since 2001, bringing the benefits of specialist business software first to small and medium businesses and more recently to global corporations and governments worldwide. We started by helping sole proprietors fulfill their dreams of owning their own business; today we are proud to retain that ethos of personal customer care for even our largest corporate clients.

Regardless of whether you are seeking a software solution for a massive project such as a major hotel chain, a medium sized hospital or your own little cybercafe on the corner, you will find our software was built with your needs and concerns in mind.

All our products work independently and can be centralized, scaling to international branching with the same simple interface. This avoids the cost of training staff, constant upgrades and incompatibility issues.

We are always keeping up with the latest technologies and investing a good part of the profit back into reasearch and development.

Our 7 days a week support is second to none, with telephone, email, instant chat, plus a knowledge base and an online forum for registered clients.

We strive to make our products easy, powerful, and reliable.

Remote Control & Reporting

Remote Control, Management, Statistics and Reporting for Your Business

Remotely monitor all your computer locations, check their status, get real-time reports and statistics charts, maintain computers, view screenshots, create promotions, check POS system inventory, plan a timely purchase of the printer supplies

- Online service collects and stores logs and reports from your remote locations
- Usage reports show customer sessions, collected payments, summary per account, IP or MAC, top customers by download, upload, time usage, sales, and number of sessions
- Real-time data filtering for a selected time interval by many parameters
- Statistics charts for time usage, runtime, shutdowns, errors, applications, download, upload, sales, sessions
- Invoices chart and report with many details like date, total amount, total sum for all invoices
- Printjob report shows printed documents with user account, printer name, document name, pages, copies
- Summary of all printed jobs per business location, separately for color and mono prints
- Application statistics displays most used applications for selected period and computer location
- Can be branded, hosted on your server, customized and developed to suit your business needs

Works With HotSpot, Kiosk, Internet Cafe, POS, Print Manager, Bandwidth Manager

Internet access control software for WiFi, wireless, wired computers and devices

HotSpot Software helps with controlling and billing your customers for the Internet usage. Customers will be redirected to the login page to sign-in or pay before getting the Internet access, or automatically logged in with remaining quota and time. The software controls download, upload, data transfer (bandwidth quota), time usage, visited pages and blocks the inappropriate content.

- Collect payment or allow free access
- Keep 100% of the profits
- Control time and bandwidth
- Manage millions of users
- Scalable from 1 room to 1 city
- No download required by users - zero client configuration
- URL tracking, filtering and keyword redirecting
- Hotel WiFi, manage ISP & WISP billing, control and limit company Internet usage
- Connects multiple WiFi hotspots to the same database (DB server is free)
- Accepts credit card payments from 70+ payment gateways

Top Selling WiFi Billing Software Worldwide

Powerful Features

Technical

- Watch online activity per customer
- Download/upload rate control (traffic shaping)
- Bandwidth quota control (traffic management)
- Control any device - wired or wireless
- Internet Connection Sharing with integrated NAT
- Smtip redirecting when ISP ports are blocked
- Secure HTTPS server included free
- Automatic e-mail notifications
- IP and port filtering and redirecting blocked URLs
- API for third-part software integration

Accounts

- Manage accounts with time, download/upload rate, quota, money balance, expiration, daily limits
- Set different levels of customer accounts; employee accounts; admin, manager and operator
- Self sign-up with credit card payment
- Share one customer account for all hotspot locations
- Optional free login: anonymous, sign-up, with keyword
- Automatic control of late payments

Logging And Statistics

- Customer data collection on sign-up or first use
- URL logging, filtering and keyword redirecting
- Statistics available in chart and table view with time usage, bandwidth, sessions, sales per period
- Logs customer, employee and general HotSpot activity
- Usage log, summary per account, IP, MAC, time period
- Print bills, reports, logs, filtered by employee or period
- Real-time usage graph

Flexibility

- Create instant free or paid HotSpot
- Secure login or autologin
- Usage scheduling when login is allowed
- Block or redirect URL by website or keywords
- Host, MAC and IP whitelists
- Language editor, 12 languages included
- Hardware independent
- Setup wizard and autoconfigure tool
- Flexible licensing; grow at your own pace

Internet Control For Professionals

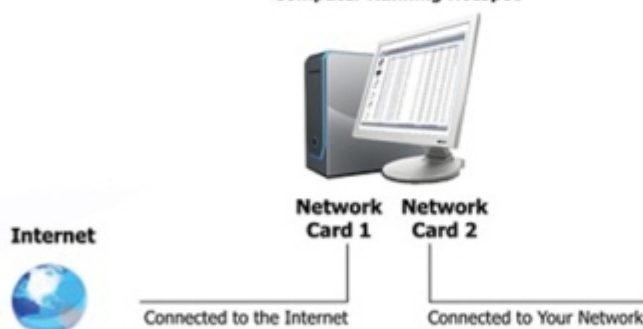

Easy Operator Interface

The screenshot shows the 'Easy Operator Interface' with a tip: 'Buy additional Operator license and generate accounts from another computer. [More Info](#)'. The interface is divided into three steps:

- STEP 1:** 'Please select price plan'. A dropdown menu shows options: '10 Minutes Test', '1 Hour Surf at 1 MB/s', '3 hours and 1GB Data Transfer for 1 week', '1 Day Pass, 250MB Data Transfer', and '1 Month Unlimited Access'.
- STEP 2:** 'How many accounts to generate?'. A text input field contains the number '15'.
- STEP 3:** 'Generate & Sale' button and 'Undo' button. To the right, a summary shows: 'Plan cost: \$0.00', 'Quantity: \$5', and 'Total: \$0.00'.

 At the bottom, it shows 'Users: 0', 'Download: 0.00 KB', and 'Upload: 0.00 KB'.

Internet Kiosk, Secure Browser and Digital Signage software converts computers into self-service kiosk

Antamedia Kiosk software locks down your public computer or kiosk, helping you securely display your website or application. It prevents hacking and downtime by restricting access to the system, desktop, drives, folders and programs based on your settings. The software blocks the system keys like Ctrl-Alt-Del and replaces the system shell for maximum protection.

Secure Browser removes standard browser menus, blocks downloads and pop-ups, limits browsing to specified URLs and blocks inappropriate content and websites. It offers customizable start page themes with multilingual support and a Virtual Keyboard for touch screen support.

Payment Station helps you collect money from your customers using coin and bill acceptors or receive credit cards payments.

WiFi HotSpot integration allows you to offer WiFi around your Kiosk. Internet service, your website or application can be offered for free or at defined price. It multiplies your revenue or service while utilizing the same hardware.

Easy-to-use, saves money and helps you protect your self-service kiosks.

All-In-One Self-Service:

- Kiosk Free or Paid
- Secure Browser
- Digital Signage
- Payment Station
- WiFi HotSpot (Add-On)

Secure Browser and Start Menu

- Prevents the user from accessing the Internet Explorer menus
- Customizable start page themes with multilingual support
- Customizable browser skins and search engine
- Virtual Keyboard eliminates the need for a computer keyboard
- Clears cookies, browser cache and print jobs
- Limits number of open pages in tabbed Secure Browser
- Defines custom URL for a start page
- Limits browsing to specified URLs and auto opens them in tabs
- Disables file downloads, pop-ups, Java, ActiveX, scripts
- Allows sending user's Email

Payment Station

- Cash collections via Bill and Coin Acceptor
- Accepts credit card payments with more than 70 payment gateways
- Prints tickets at different prices for Kiosk and WiFi HotSpot usage
- Runs on the same Kiosk PC
- May run on a different PC and provide tickets for all Kiosks and WiFi
- Top-up user accounts for returning customers
- CCTalk support

Digital Signage

- Configures your advertisement message by combining videos, images, webpages, flash animations
- Engages customers and arouses interest in your products and services
- Endless possibilities: use it for various applications, retail advertising, employee training, consumer information, weather updates...
- Added revenue - sell advertising space
- Cost and time savings - unlike printing all changes can be made in a minute with no additional cost
- Flexibility - Instead of one static image, show multiple slides or dynamic graphics to capture the attention of customers
- Runs continuously or as your screensaver when Kiosk is not in use

WiFi HotSpot Add-On

- Redirects customers to the login page to sign in or pay before getting the Internet access
- Runs on the same PC for maximum hardware utilisation, increasing ROI
- Optionally runs on a dedicated server and controls all user computers, laptops, mobile devices in your LAN. Ideal for Hotel WiFi
- Controls time and bandwidth usage for unlimited user accounts
- URL tracking, filtering and keyword redirecting
- Runs as a gateway and uses any access points in your network
- No download required by users
- Based on our proven WiFi HotSpot solution

Self-Branding and Customization

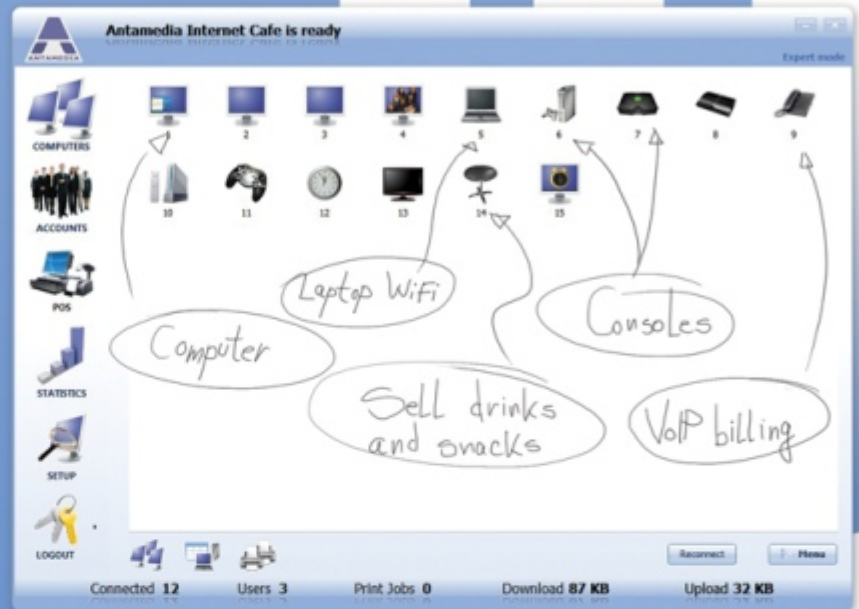

- Change your logo, contact details, graphics and links to the webpages
- Customize Start Page themes or modify entire layout
- Create your own Start Menu items with programs or games
- Integrated language translator for multilanguage support
- Multiple kiosk modes help you build perfect solution for your needs
- Kiosk free usage - anonymous, signup or with a shared password
- Kiosk paid use - accept payments and create accounts on a central Database Server to allow the customers to return to the login with remaining time
- We can assist you or develop an entirely new theme for your business, interface your application with the Kiosk, or develop new software

ANTAMEDIA INTERNET CAFE

Control EVERYTHING

- Computers
- Consoles
- Printers
- WiFi Laptops
- Bandwidth
- Point of Sale
- VoIP Billing
- Remote Desktop
- Customers
- Vendors
- Employees
- Inventory
- Loyalty
- Licenses
- User Files
- Appliances

Antamedia controls, secures, and enhances the running of your Internet cafe, gaming center, library, school or hotel public computers.

The software restricts access to the system, desktop, drives, folders and programs based on your settings. It helps you control and bill your customers for the Internet browsing, playing games, using Office applications, VOIP calling; even covering retail products.

- Internet Cafe controls the time usage of your computers and game consoles
- When inactive, all Internet Cafe Client machines are automatically locked with a protection screen
- Client software limits the customer activity the way you want it - hides desktop icons, the Windows button, prevents the access to the system, Control Panel, blocks Ctrl+Alt+Del and other system keys
- Controls WiFi HotSpot users and limits download and upload rate
- Controls all your printers and optionally deducts print cost from customer time
- Full POS system with customer loyalty, advanced statistics, reports and logs
- Manages customer accounts with time, download/upload rate, money balance, expiration, daily limits, loyalty
- Paid usage with user accounts, tickets, refills, prepaid and pay-as-you-go
- Optional free usage with anonymous login, shared password or free sign-up
- Customizable login screens, skins, printed receipts, reports
- Configurable applications and pricing per category: Internet, Games, Office, Media, Util, Misc
- Cash collections with bill and coin acceptor, receives credit card payments through 70 payment gateways
- Smart cards automate login on clients, stores customer details, loyalty program, money balance, reward points
- Client Remote Desktop control helps configuring computers or helping customers from your server
- Scalable from a single PC to an international network using different languages!
- Controls distant remote computers, connected through different ISPs and behind firewall
- Connects all your cafes for a single account login
- Carefully designed with the business owner in mind, avoiding the cost of any full-time technical staff
- Deployed in more than 170 countries in 30 languages. Works with Microsoft XP/Vista/Win7/Server

Advanced Statistics & Reports

Control

- Control clients from server - lock and unlock computers, reboot, shutdown, watch or remotely control any desktop screen
- Control game consoles either with manual timing, or fully automated by deploying X10 remote control devices
- Controls all your printers and who is allowed to print, add cost to the bill, or deduct credit from the customer's online time
- Bandwidth Management for both fixed line and wireless data traffic
- VoIP Support helps you bill customers for SMS and phone calls
- File Transfer from your server to any of the computers
- Power Save by shutting down computer when the user finishes session

Protect

- Prevents hacking from accidental and malicious user attempts
- Restricts access to local drives, Internet Explorer settings, Control Panel, edits restricted programs, and blocks any window by keywords
- Reboot Protection ensures that every client disconnection is processed and your customers' bills are maintained
- Activity Log stores all events like session start and stop, sales, account modification, incorrect login attempts etc.
- Optional hardware for fully automated login, billing and security: smart cards, card readers, cash drawers, X10 devices

Manage

- Centrally configure applications for all your computers with name, image, description, age ratings
- User Profiles help customers create a backup of the files, saved game positions, downloads, and restores them on the next customer login
- Licence key management transfers game licence key on a computer where the game is played, saving on the licenses you have to buy
- Customizes print templates for tickets, bills and reports
- Staff and Customer Photo ID may be stored for logging and verification
- Usage Schedule defines daytime when customer can login
- Statistics and reports include time usage, number of logins, sales, download/upload transfer, computer activity, application usage

Integrated or Standalone POS System

POS System

- Combines cafeteria or restaurant billing with cyber cafe control
- Available also as stand-alone, POS connects to the same database, and separates customer orders and billing
- Stock-keeping warns when items drop below your specified amounts
- Built-in Ordering System helps customers order items from the chair
- Membership cards with a reward system engage your customers to collect points and redeem them for rewards

Use Your Own Logo on the Clients

Modern and Easy User Interface

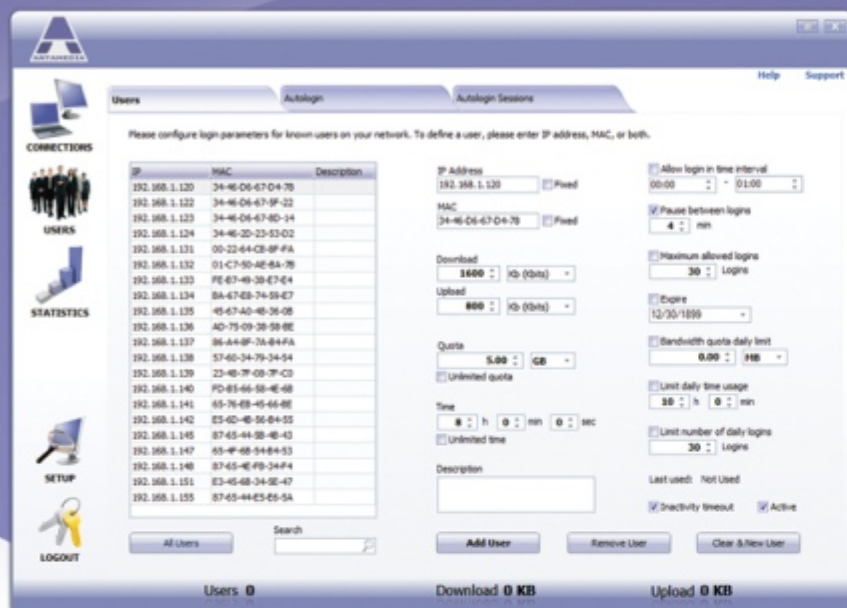

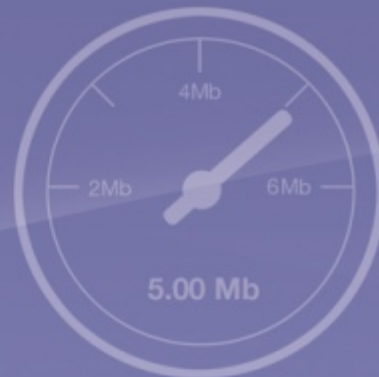

Apps, Orders, Prints, Calls, SMS

Strong Protection. Maximum Profits. Happy Customers.

ANTAMEDIA BANDWIDTH MANAGER

Perfect For:

Companies
Small Businesses
Internet Cafés
Game Centers
Hospitals
Schools, Universities
Business Centers
Limiting Kids Internet
Usage at Home

Feature-rich control over Internet usage for every computer in your network. Easily control download and upload rates, limit bandwidth quota and time usage, share Internet connection, filter websites, speed up your network and reduce costs

Bandwidth Manager Benefits

- Reduces your overall bandwidth requirements, saving money
- Improves network efficiency for happier, more productive users
- Avoids employees wasting time with YouTube, Facebook, downloads
- Prevents software hanging from unresponsive Internet connections
- Protects your business by preventing access to blacklisted sites
- Dedicated speed and/or bandwidth where it's needed most
- Added security, by cutting connections outside of working hours
- Tracks bandwidth use, so you can see where your money goes

High bandwidth costs?

Tired of complaints from a slow net connection?

Advanced Features – More than Just Bandwidth Management

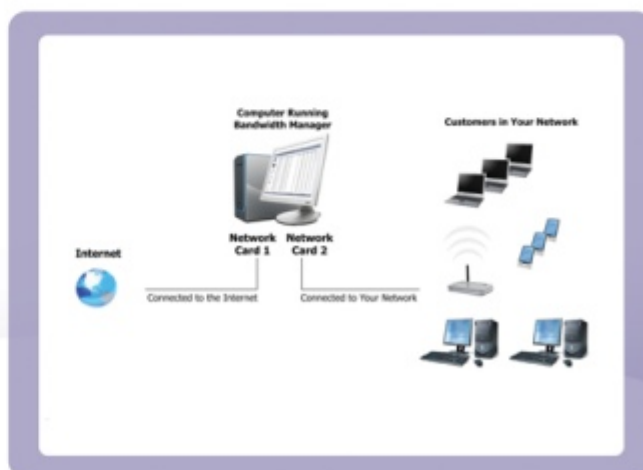

Antamedia Bandwidth Manager is different from most bandwidth management software applications, with a wider range of advanced features, coupled with ease of use for you, the administrator:

- True bandwidth management by kilobyte, rather than IP to IP or rules
- Flexible: Each computer can have different download and upload rates
- Controls both speed and bandwidth (e.g. 60 Kps, 10 Mb, or both)
- Bandwidth Manager doesn't need proprietary hardware, saving money
- Easy deployment on any standard PC with two network cards
- "Gateway" system, with easy-to-use centralized control panel
- Real-time monitoring of active computers
- Limits computers with time and quota sessions for precise control
- Time of day feature, preventing use outside of allowed hours
- Can be set to log out after inactivity, freeing bandwidth
- Automatic log in modes for recognized and/or new computers
- Whitelisted sites e.g. your company site, do not use quota (optional)
- Detailed statistics, down to the usage of a specific PC

Total Control

Bandwidth Manager also gives you real control over what can be accessed, making it ideal for schools or preventing illegal or dangerous downloads:

- Blacklisted sites can be blocked 100%, with optional redirect
- Sensitive IP ranges can be blocked, e.g. your wages department
- Block by keywords, such as sexual or political terms
- Redirect specific keywords in URL to safe or approved sites

**Internet access can be harmful and expensive if not controlled.
Protect your network and reduce costs !**

Monitor, Control and Restrict User Printing

Print Manager helps with print control, printer management, user billing and centralized printer tracking. Its advanced features cut down on print costs, offers highly flexible user account control and provides detailed reporting and statistics

- Extra profitability via saving costs
- Option to make profits directly by billing for printing
- Highly flexible, e.g. control by user, user group or printer
- In-depth pricing plans with auto-top-up or pay-as-you-go
- Restricts the ability to print until after payment
- Restricts or charges per page, copy, if color, duplex etc.
- Blocks documents by keyword e.g. "confidential"
- Easy to understand tabbed interface
- Logging and statistics
- Entirely software-driven – no hardware or upgrades required
- Self-contained – no database licensing or other software needed
- Safe to install, without affecting the rest of your network
- Works with Microsoft XP/Vista/7/Server

Features

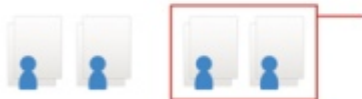

- Printer Independent, compatible with major printer brands
- Controls directly connected and network printers
- Flexible account control for unlimited users
- Advanced settings for each account include limiting by money balance or printed pages, unlimited printing, daily limits, datetime restrictions, printjob restrictions like color, number of copies...
- Real-time statistics and reports
- Print billing per page, if color, duplex etc
- Advanced prices based on various combination of paper size and color
- Print Manager history with printjob details
- Print Rules automatically print or delete user's printjobs
- Operator mode for a quick 1-2-3 user account creation
- Print Release Station allows authorized persons to release held jobs
- Manual or automatic printjob control
- Automatic Refill and Top-Up increase account money balance or available pages
- Print Agent (client) software helps the user confirm or cancel printing
- User Groups and Organizational Units supported
- Print Job Viewer shows content of the currently paused print jobs
- Usage Scheduling defines daytime templates when printing is allowed
- Account balance displayed in client after each printjob
- Active Directory supported for easy import of accounts
- Employee accounts with defined access rights
- Activity log of employees, administrator and customers
- Multiple location support helps share accounts between connected offices
- Language editor helps customizing or translating into your language

Print Agent - Client Software

Print Agent (client) is installed on every computer where you want to track printing. When a user prints a document, Print Agent pop-up will show document name, number of pages and copies. After authentication, the document will be released for printing and the user account billed or print quota updated.

PERMISSIONS

If the printer control could save just 10% of your printing costs, how much would you save? Stop "out of control" printing !

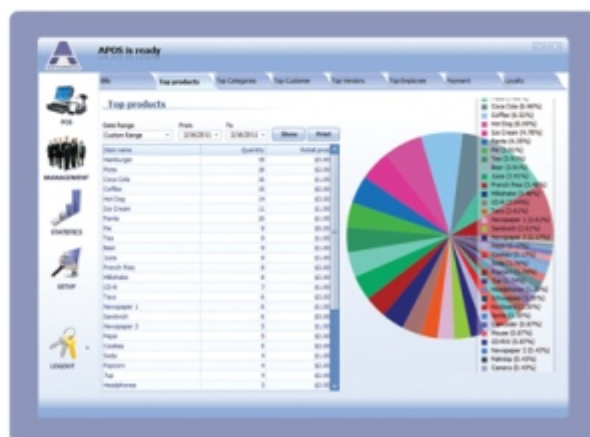

ANTAMEDIA POINT OF SALE

Thousands of Customers
Relies on Our EASY-TO-USE
POS System, Now Available
With Plenty New Features

Easy-to-use point of sale and inventory control system help you track all your sales, customers, vendors, purchase orders, and get real-time reports and statistics

- POS items are configured with name, category, retail price or margin, image, minimum quantity on stock
- Reports and statistics show you top selling products, categories, customers, vendors, employees, and loyalty statistics
- Customer center stores customers' details for identification or billing and delivery purposes
- Loyalty program emotionally engages customers to use your services, collect points, and redeem awards
- Hold / Unhold helps you hold current unfinished payment to quickly bill another customer order
- Easy Quick-Edit POS items - increase stock, change minimum stock warning, add new item or category
- Get notified when item quantity drops below specified amount, so you can order only what you need
- Promo pricing & happy hour configuration - offer discounts for desired products to stimulate sales
- Vendors Accounts helps you create purchase orders for required products, keep track of the bills and payments
- Quick price changes of the selected products, or categories. Put easily last stock items on sale
- Virtual keyboard feature helps enter data on a touchscreen
- Button size is adjusted for an easy data entry
- Caller ID Support finds a customer and the purchase history on a phone ring, so you can greet customer by name

CUSTOMIZATION OF OUR SOFTWARE

Your Business, Your Logo

Antamedia gives all the benefits of custom-made software, yet with affordable, off-the-shelf products!

Almost every element can be customized, including start-screens, a choice of 'skins', and placing your logo on printed receipts.

We understand it's your business. All logos, text and the entire appearance of our software reflect that – and we've made self-branding push-button simple!

Development

We are constantly engaged in meeting customers needs and requests. Development includes feature extensions, new features, integration with third-party products, user interface design, database integration, hardware interfacing, web applications.

If you are looking for a highly experienced team of developers and designers, Antamedia can help you and provide a high quality product.

OEM Branding

Antamedia provides special installers for all our software, branded with your company name, logo and contact details instead of Antamedia.

Almost every element can be customized including software brand name, colors, icons, themes, skins.

The service is fee-based depending on the customization level and does not include licenses.
