## Ordering and Licensing

Lifetime license and download are be available after the purchase. Antamedia Sales sends an Email with instructions how to activate the software. Licenses are sent out automatically upon successful customer identification.

### Ordering

1. Online on Antamedia website [www.antamedia.com/buy](http://www.antamedia.com/buy)

Our payment processing partner Avangate will process the payment (usually within 5-10 minutes), and we'll immediately send you instructions how to activate the software. License is automatically delivered within a minute after completing activation steps.

2. By Emailing your order to [sales@antamedia.com](mailto:sales@antamedia.com)

3. Through Antamedia approved partners, VARs and distributors

When contacting us, please include

1. Your Email, phone number, billing address
2. Your company name and contact person
3. Products and quantity you wish to order
4. Name of the bussiness where license will be installed

Payment can be completed using major credit cards, PayPal and bank wire transfer.

### Windows 7 32/64bit Compatible

Antamedia software can be installed on Windows 7, Server 2008/2003, Vista, XP.

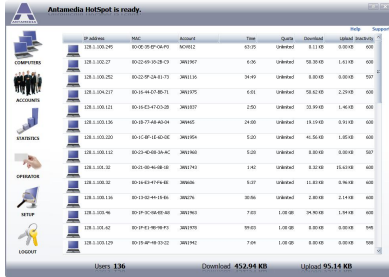

### Digitally Signed for Your Safety

Antamedia software is clean and safe, with no warning messages on 64bit systems.

## Standard and Premium Support

This plan is designed for our customers for whom system availability is not mission critical, may be in a low-complexity environment, requiring business hours support and access to software updates.

**SUPPORT:** Standard support is included for free with Antamedia products and has no time limit. You will get help using Email, tickets, live chat, knowledge base and community forum.

**MAINTENANCE:** You will be able to update software with minor version builds, for example you would get all V3.x updates if you purchased V3. The 3 months maintenance included with Standard support entitles you to a free upgrade to the next major version if it is released within 3 months of when you purchased your license. For example, upgrade from V2 to V3.

## Premium Support and Maintenance

This plan is ideal for our customers for whom system availability is business critical, and who require software investment protection.

**SUPPORT:** Your support requests will be given priority over other customers who are using standard support. You will get help using Email, phone, tickets, live chat, knowledge base and community forum, and you will be given an exclusive priority support email address that is staffed especially for you.

**MAINTENANCE:** At the time of purchase you can extend the standard 3 months maintenance to one year and upgrade the level of support you receive. One year of maintenance entitles you to a free upgrade to the next major version if it is released within 1 year of when you purchased your license.

**REMOTE DESKTOP:** Remote Desktop support and remote configuration are included with Premium Support. Antamedia experienced engineers will remotely connect to your computer, install and configure software you need. We'll suggest the best practices for maximum performance and perform routine checkup.

Please contact us for details and quote.

We will usually be able to respond to your emails and support calls within an hour during the working day: 9AM-11PM CET (3AM-5PM EST). Support is still available outside of these hours but it may take us longer to respond; possibly up to 24 hours in some cases. The Premium Support and Maintenance can be renewed within 90 days of its expiration to maintain the same level of support and maintenance.

Antamedia is a privately held company (since 2001), bringing the benefits of specialist business software first to small and medium businesses and more recently to global corporations and governments worldwide. We started by helping sole proprietors fulfill their dreams of owning their own business; today we are proud to retain that ethos of personal customer care for even our largest corporate clients.

Regardless of whether you are seeking a software solution for a massive project such as a major hotel chain, a medium sized hospital or your own little cybercafe on the corner, you will find our software was built with your needs and concerns in mind. All our products work independently and can be centralized, scaling to international branching with the same simple interface. This avoids the cost of training staff, constant upgrades and incompatibility issues.

We are always keeping up with the latest technologies and investing a good part of the profit back into research and development. Our 7 days a week support is second to none, with telephone, email, instant chat, plus a knowledge base and an online forum for registered clients.

We strive to make our products Easy, Powerful, and Reliable.
