ABOUT ANTAMEDIA

Antamedia has been developing software and specialized solutions for both small and middle-sized businesses since 2001.

We initially helped entrepreneurs realize their goals and start their own businesses, and today we are proud to retain that ethos of personal customer care for even our largest corporate clients.

Antamedia was a pioneer in WiFi software business in 2006 and since then we have expanded the list of solutions for WiFi control with Cloud innovative solutions.

Regardless of whether you are seeking a software solution for a massive project such as a major hotel chain, a medium sized hospital or your own little cybercafe on the corner, you will find our software was built with your needs and concerns in mind.

All Antamedia software solutions work independently and can be centralized, scaling to international branching with the same simple interface. This avoids the cost of training staff, constant upgrades and incompatibility issues.

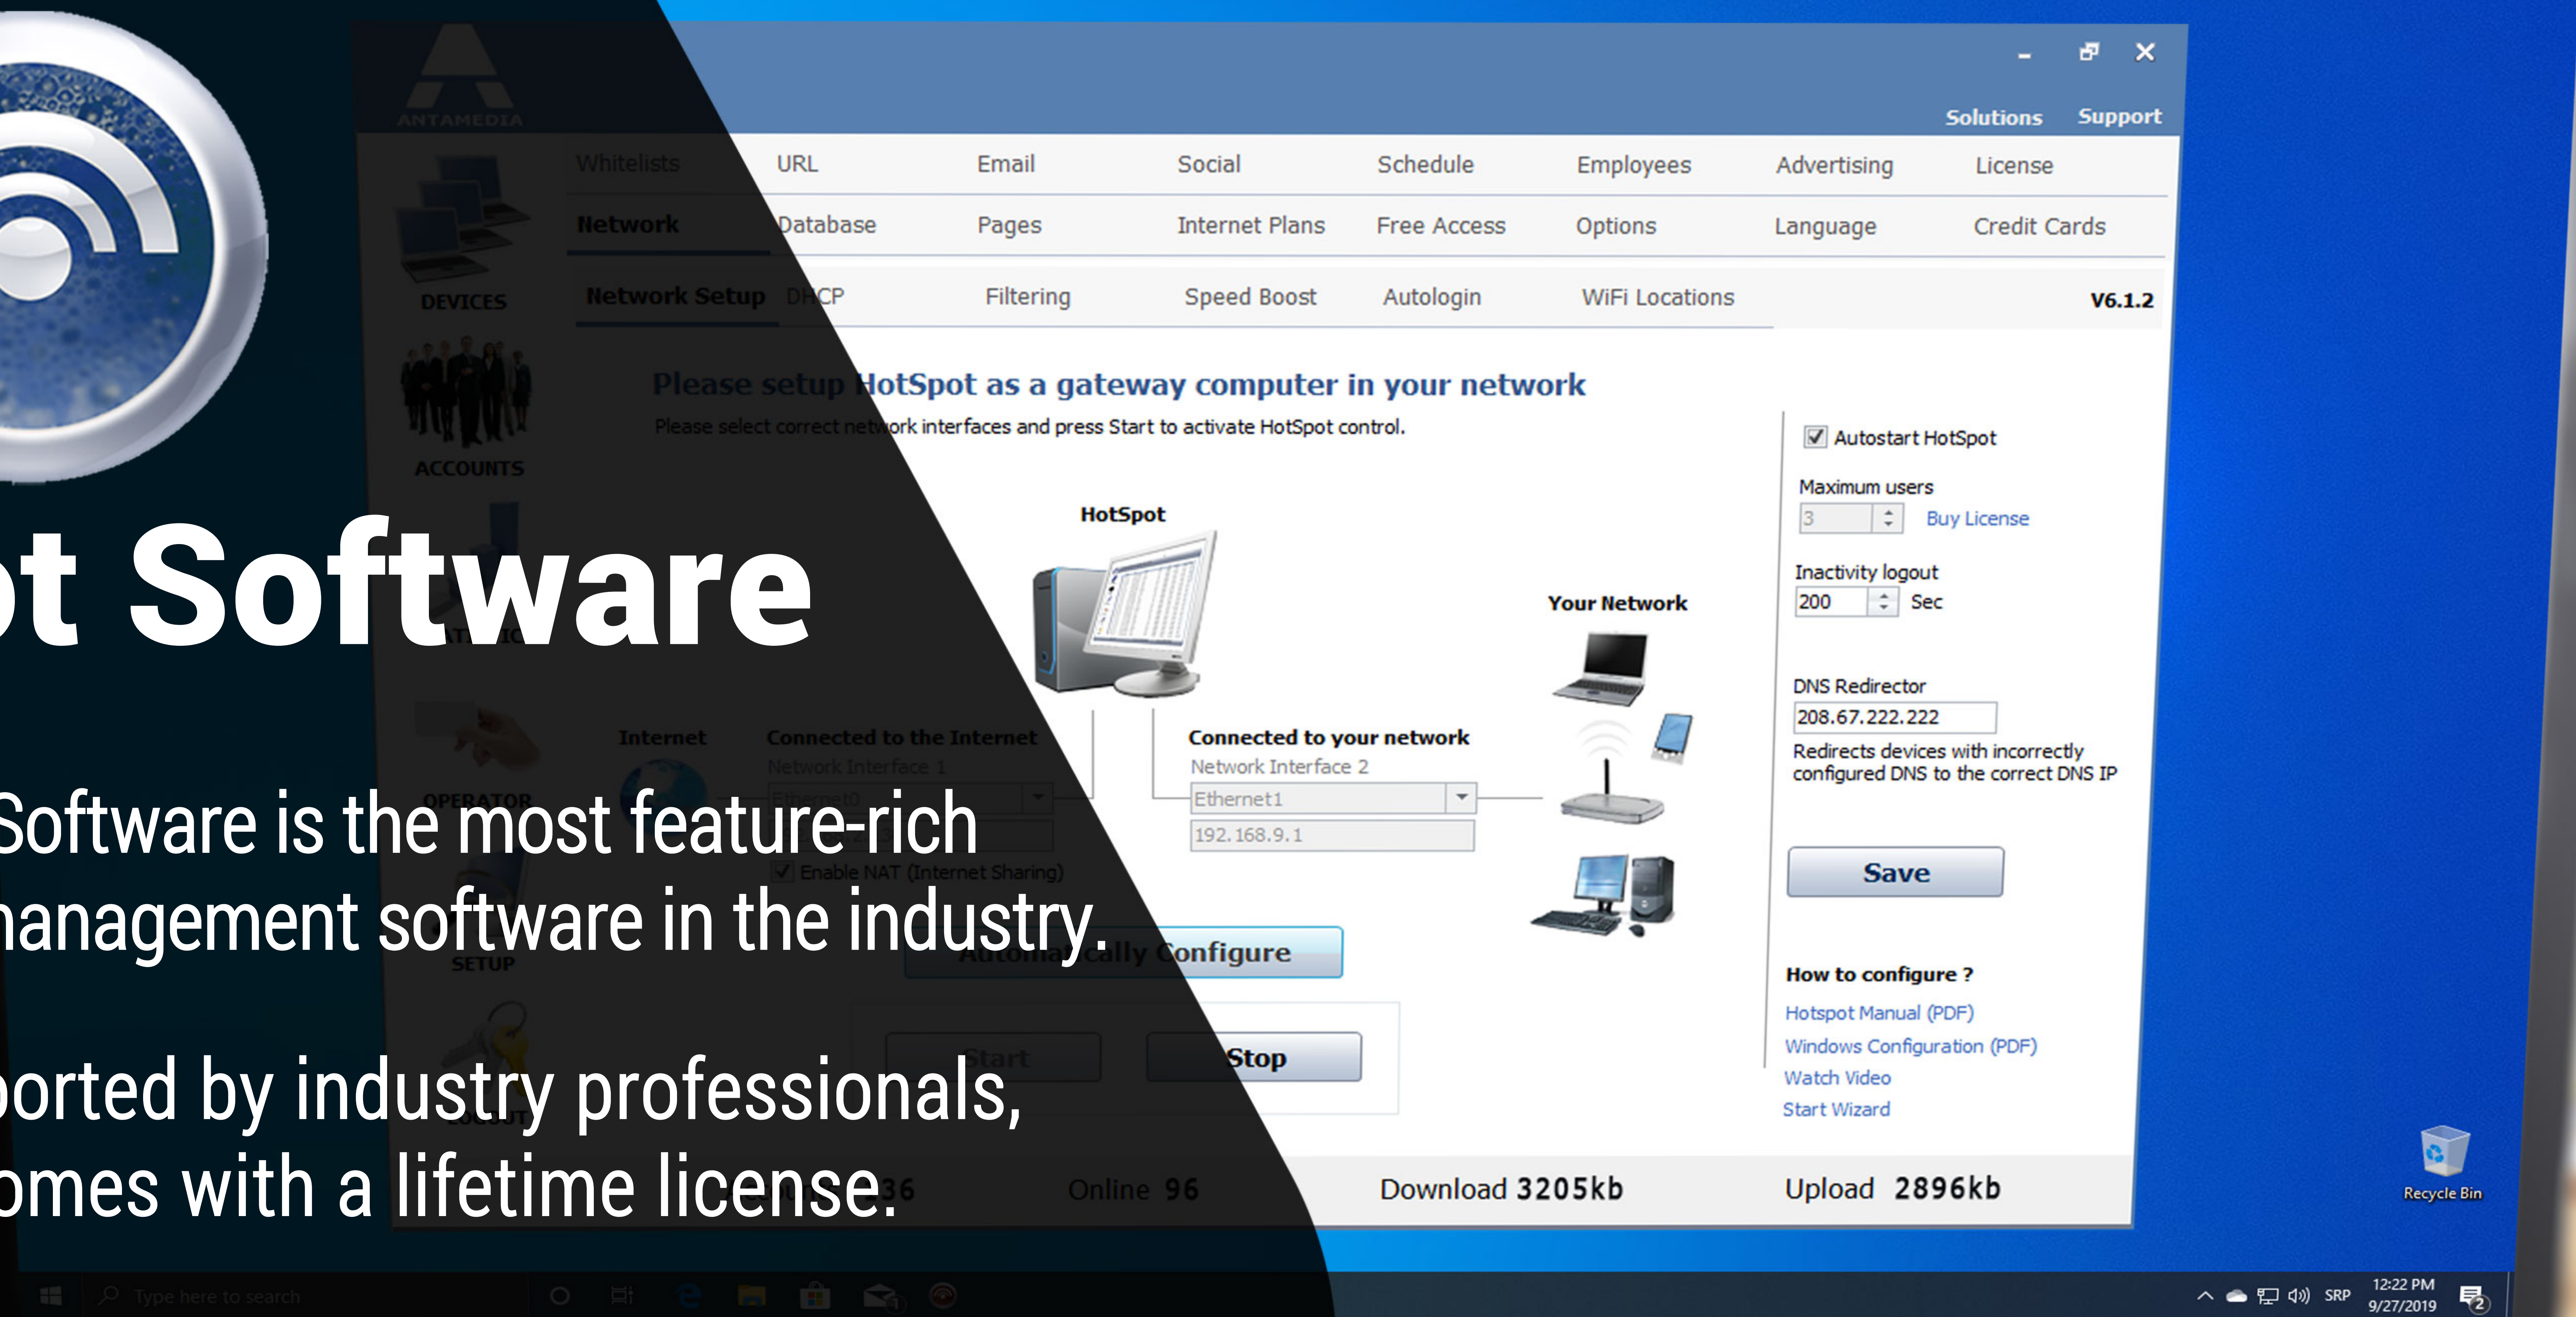

HotSpot Software

Antamedia HotSpot Software is the most feature-rich guest WiFi hotspot management software in the industry.

Developed and supported by industry professionals, HotSpot software comes with a lifetime license.

QUICK WiFi ACCESS

LOW MAINTENANCE COST

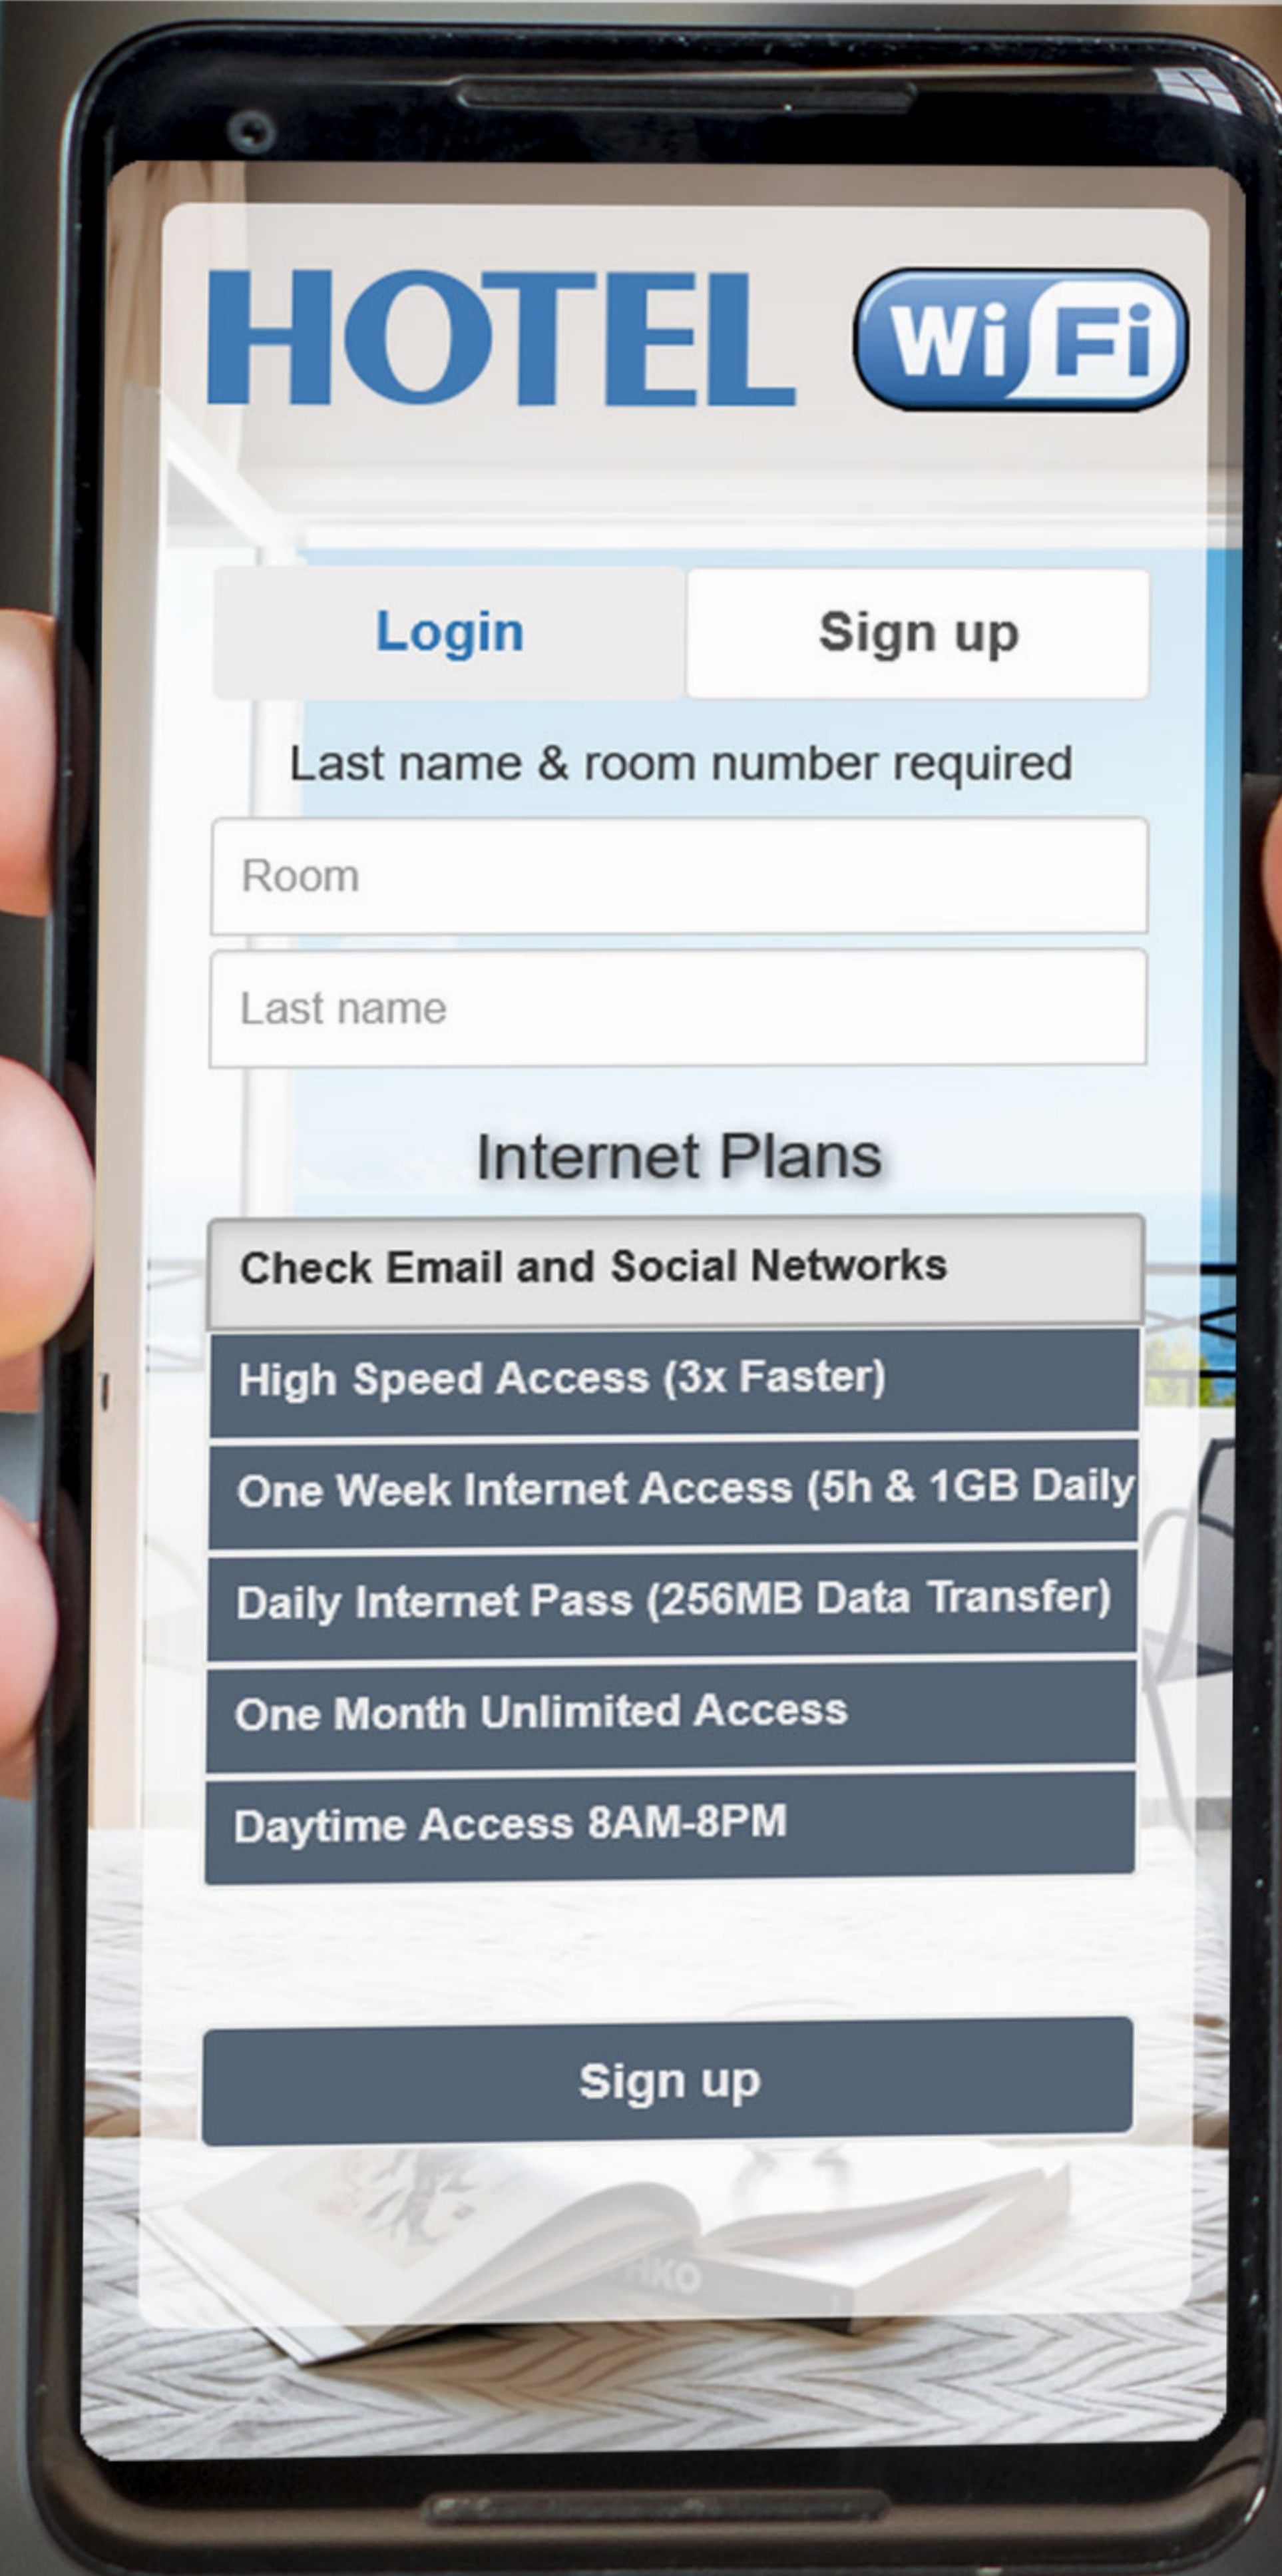

KEEP ALL PROFITS

BETTER INSIGHT

- Easily create prepaid accounts or voucher tickets
- Post charges to the guest room using PMS interface
- Free access with daily limits on download, time, data
- Combine free trial with paid faster access
- Remote HotSpot operator for front-desk staff
- Require accepting terms of use before session
- Collect guest data (name, Email, address)

HotSpot Software helps you control and bill your customers for the Internet access, engage them with captivating ads, collect guest data and surveys, send automatic promo emails.

Build a free guest WiFi using social login, shared keywords, SMS or Email verification, or offer a faster paid WiFi access with a credit card or PayPal payments, pre-printed tickets, Hotel PMS integration with room/name, and keep 100% profit.

- Accept credit cards & keep 100% profits
- Automatic Emails for marketing
- Manage multiple hotspot locations
- Active Directory Integration

Internet Cafe

Antamedia Internet Cafe is a Windows - based client / server application that secures public Internet computers, kiosks, self service devices, controls WiFi HotSpot laptops and mobile devices, provides POS facilities and much more.

The software restricts access to the system, desktop, drives, folders and programs based on your settings.

It helps you control and bill your customers for the Internet browsing, playing games, using Office applications...

- Easily generate user accounts and tickets
- Accept credit cards and PayPal payments
- Pay & Play, Pre-Paid prices and vouchers
- Server, Clients and WiFi Control
- Printer control and management
- Remote control your computers
- Download and upload rate control

Your public computers are protected with the Client Login screen. Customers are prompted to enter valid username and password to get Internet access, or to start playing games or using programs.

After successful login, your customer will see the remaining time and bandwidth quota, expiration date and other relevant info.

Who is Using Internet Cafe Software?

Internet Cafe, Cyber Cafe

Gaming Centers

eSport Centers

University, School, Library

- Usage daytime schedule for customer login
- Age ratings with ESRB
- POS hold / unhold payment
- License management minimizes game license costs
- Choose HotSpot login page: free, ticket, user/pass

Maximize Revenue and Protect your Internet Cafe

Kiosk Software

Kiosk software converts computer into self-service kiosk.

It prevents hacking and downtime, blocks the system keys like Ctrl-Alt-Del, restricts access to the system, desktop, drives, folders and programs.

You can use it to securely display your website or application, show marketing messages and advertisements, bill for Internet use, games or office applications, sell tickets for WiFi HotSpot around your kiosk, and much more...

- 
- A man with a beard, wearing a grey suit jacket over a white shirt, is shown in profile, looking down at a kiosk screen. The kiosk has a purple frame. The background is a blurred interior with wooden paneling. A semi-transparent white box in the top left corner contains a list of features.
- Lock down your kiosk or public computer
 - Blocks Applications and Program Options
 - Control, charge and limit printed pages
 - Folder Access Rights
 - Password Protected Kiosk Setup
 - Secure Browser
 - Disable File Downloads

Minimize staffing requirements and automate common tasks with applications. Popular uses are for airport and hotel check-in, concerts and fitness clubs, hospitality and sports events.

Antamedia Kiosk software helps you easily implement free or pay for use kiosks, and configure applications available for customer use.

Who is Using Kiosk Software?

Check-in & Reservation

WiFi HotSpot Kiosk

Pay Station
