HOTEL WiFi™

Deployed by major hotel chains and small hotels for over a decade, Hotel WiFi solution improves WiFi control and guest satisfaction
ANTAMEDIA

IDEAL SOLUTION FOR YOUR HOTEL

A quick and reliable WiFi network throughout the hotel nowadays is one of the most significant amenities when choosing the most suitable hotel.

Antamedia HotSpot Hotel WiFi Software is the most feature-rich guest WiFi hotspot management software in the industry.

It helps you control and bill your customers for the Internet access, engage them with captivating advertisements, collect guest data and surveys, send automatic promo emails...

Create a free or paid Hotel Internet access, integrate with Hotel PMS software to automate guest login with room and name, enagage guests with advertisements, collect surveys and understand what you can do better to improve guest satisfaction.

TAKE CONTROL OVER YOUR HOTEL WiFi

Today's travelers expect excellent WiFi in every hotel. Take your WiFi to the next-level and improve quality of the Internet service, guest satisfaction and overall Hotel review rating.

Antamedia HotSpot software helps you offer free or paid Hotel WiFi access, efficiently manage and control it:

• Easily create prepaid accounts or voucher tickets
• Post charges to the guest room using PMS interface
• Free access with daily limits on download, time, data
• Combine free trial with paid faster access
• Remote HotSpot operator for front-desk staff
• Require accepting terms of use before session
• Collect guest data (name, Email, address)

Set up Hospitality WiFi using Windows based computer, configure your branding, create extra profits.
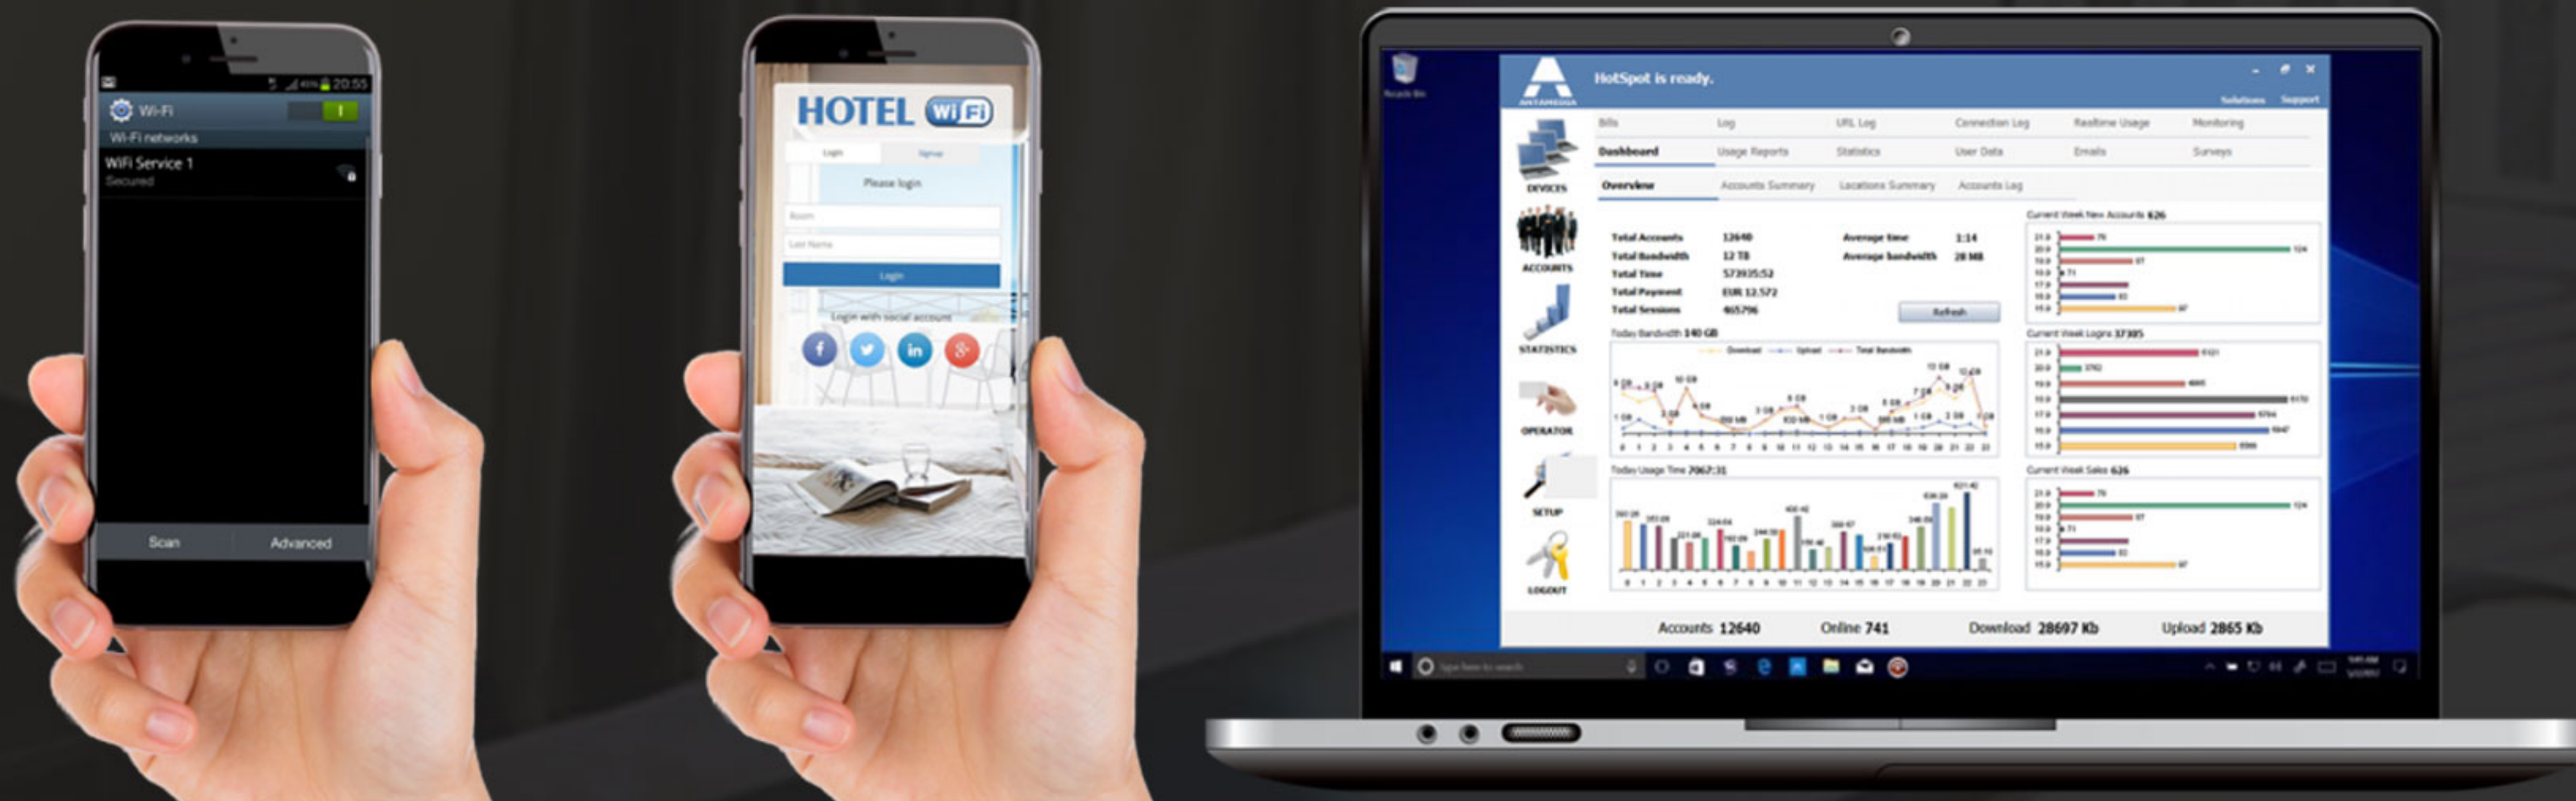

No compromises.

HOW HOTEL WiFi WORKS?

When your guest connecting to WiFi, a welcome page pops up on a device. You can easily customize the welcome page by setting the logo, background, colors and the ways in which your guests can access the Internet.

To get the Internet access, guest may login with an existing account or signup for your services: by paying with a credit card or PayPal, by charging the bill on the room number, or by enter a voucher ticket. Entire profit is 100% yours.

Antamedia HotSpot Hotel WiFi software will control the duration, speed and bandwidth, and optionally collect your customers e-mail, name, address, for your safety and marketing activity.
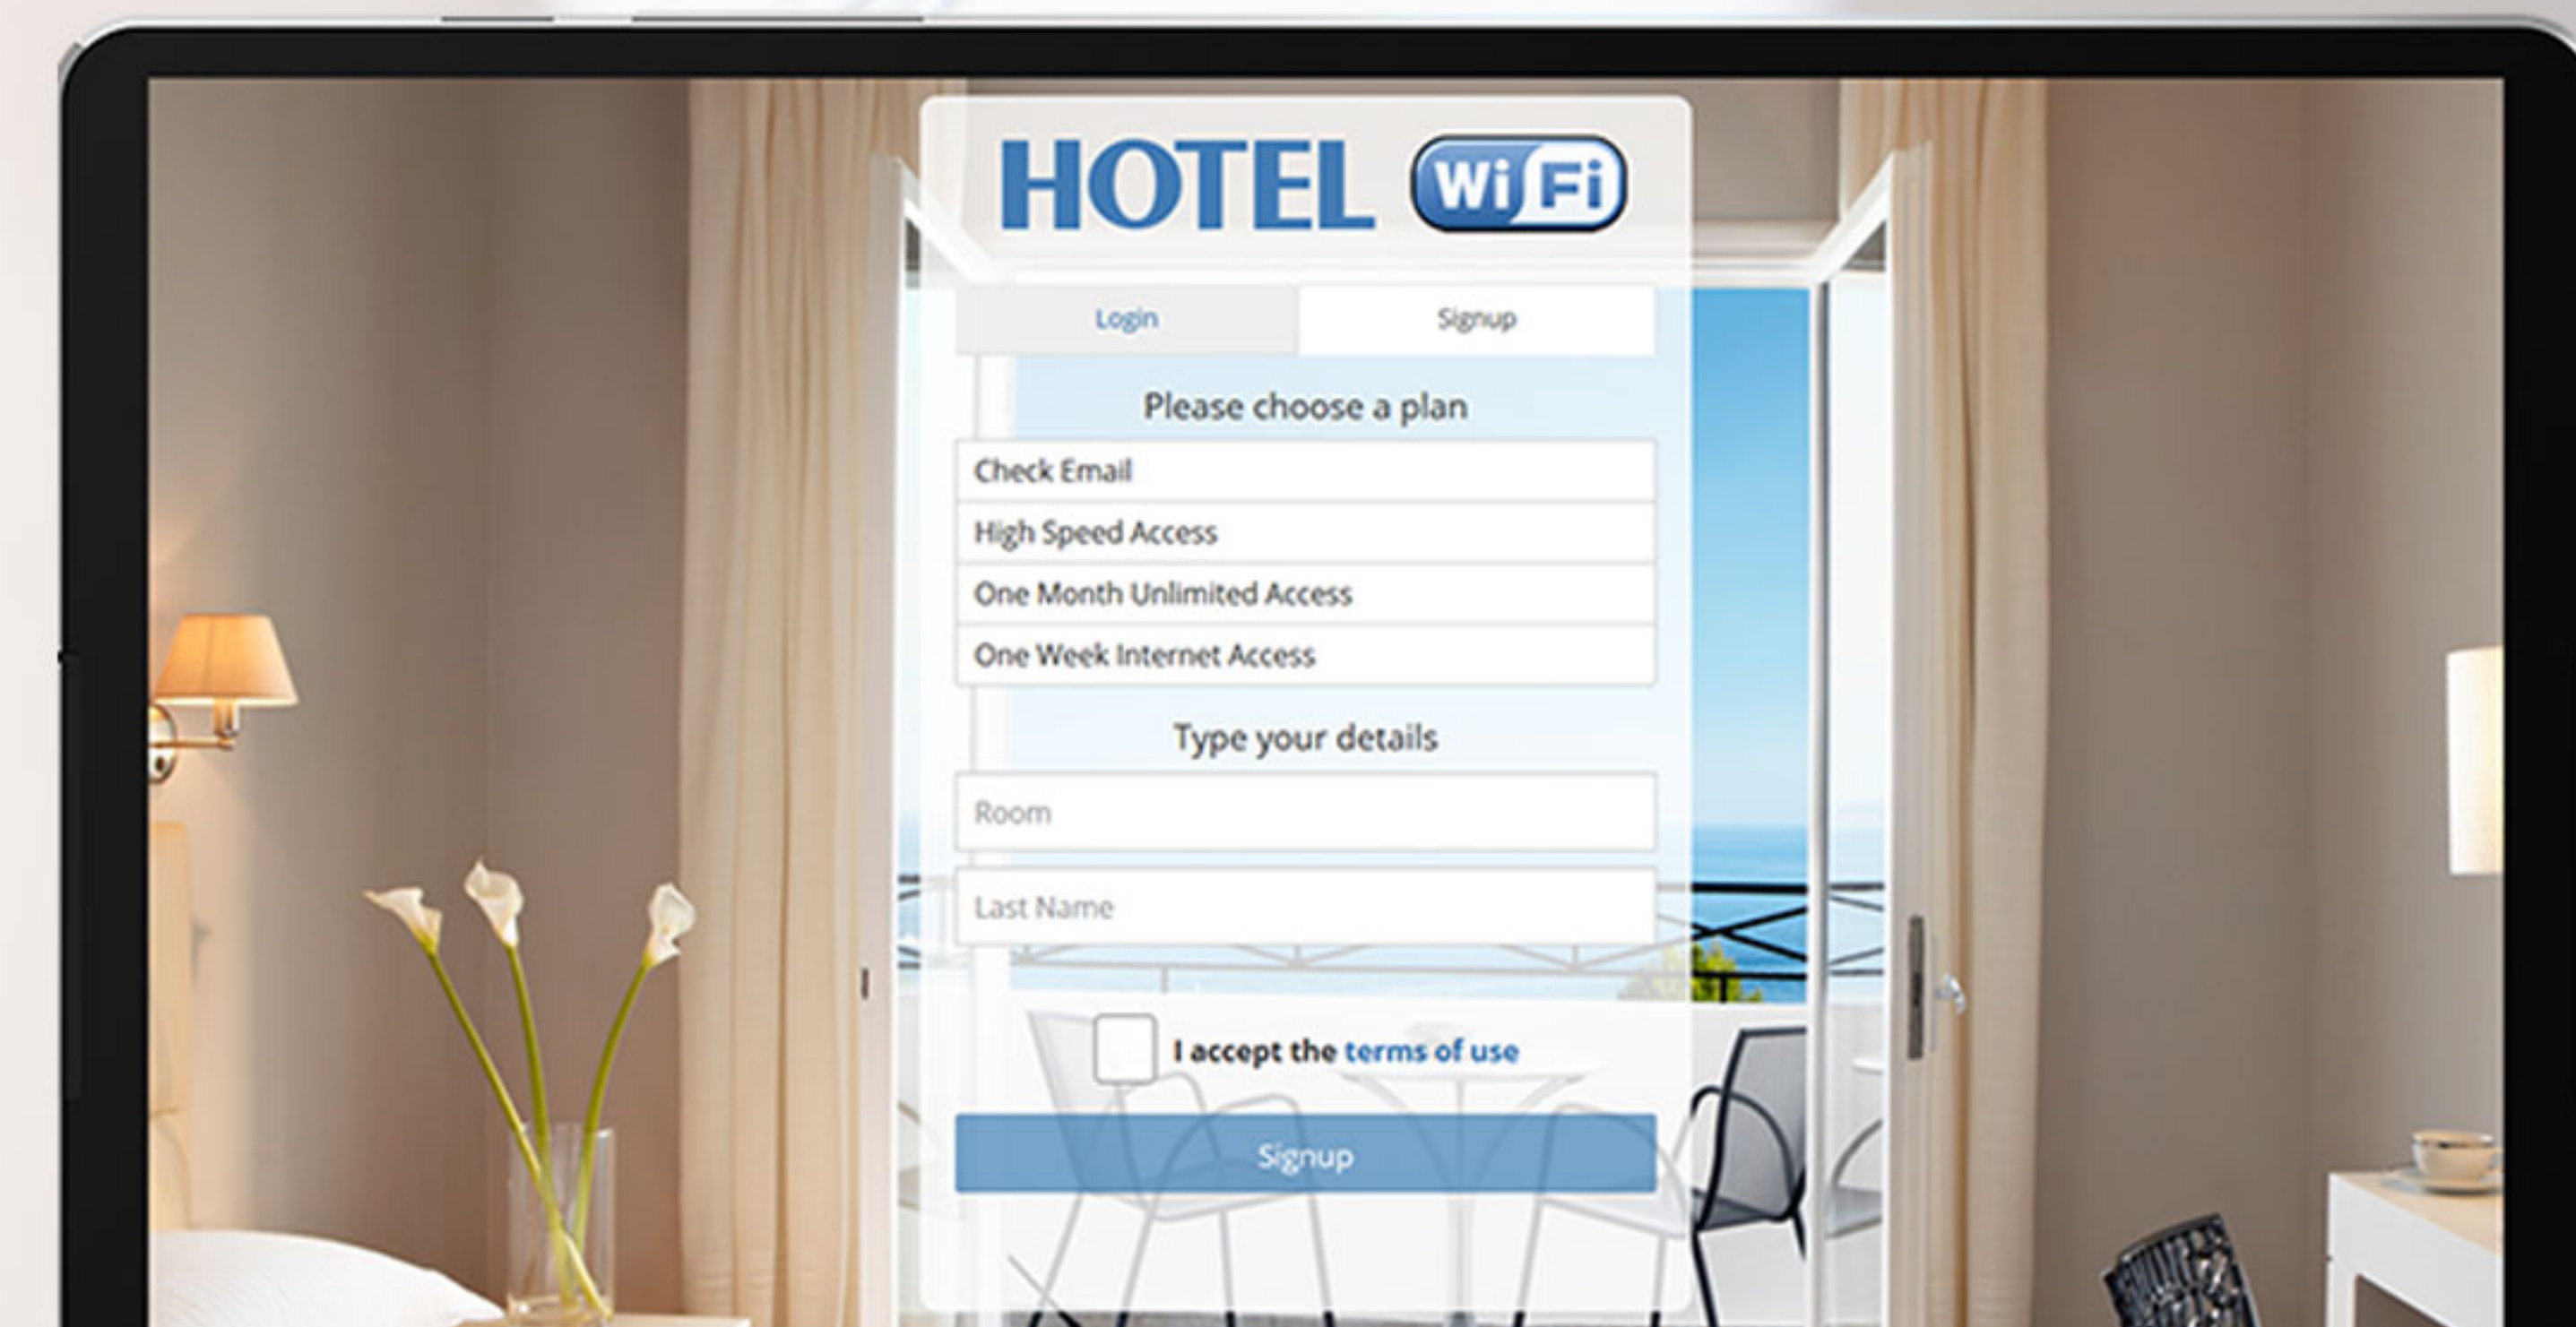

INTERNET CONTROL

HotSpot Hotel WiFI software precisely controls the Internet access speed, data transfer and a number of devices which a guest can connect to your Hotel WiFi network.

Since there is a greater demand for streaming services, hotels cater to their guests by limiting the access speed so that each and every guest could be granted excellent WiFi. The guest is allowed to use multiple devices (1, 2, 3 or more) per room.

Business customers can be offered a higher Internet access speed, which can be paid by card at the receptionist's, or granted for free, as a benefit available to members.

ENGAGE WiFi USERS

Display image and video ads on your Wi-Fi HotSpot pages for a complimentary Wi-Fi access.

Create surveys to get valuable insight into customer needs, behaviour or wishes.

Configure hotspot software to display targeted coupons based on survey data provided.

Collect customer data and send Email campaigns.

Engage customers with special offers and build customer loyalty.

PMS INTEGRATION

One of the most important features is the integration with the Hotel PMS system. It enables a guest to log in to WiFi via room number and name, which completely automates the access and facilitates guest access to the Internet.

Guest Internet access will be limited by Internet plan (download/upload), time, quota, expiration time, number of devices that can be connected. If a guest needs higher speed, you can offer paid access posting the Internet plan charges to the guest room.

Upon successful login, a guest can be redirected to the hotel web site, special promotion, or the page containing his/her access data.
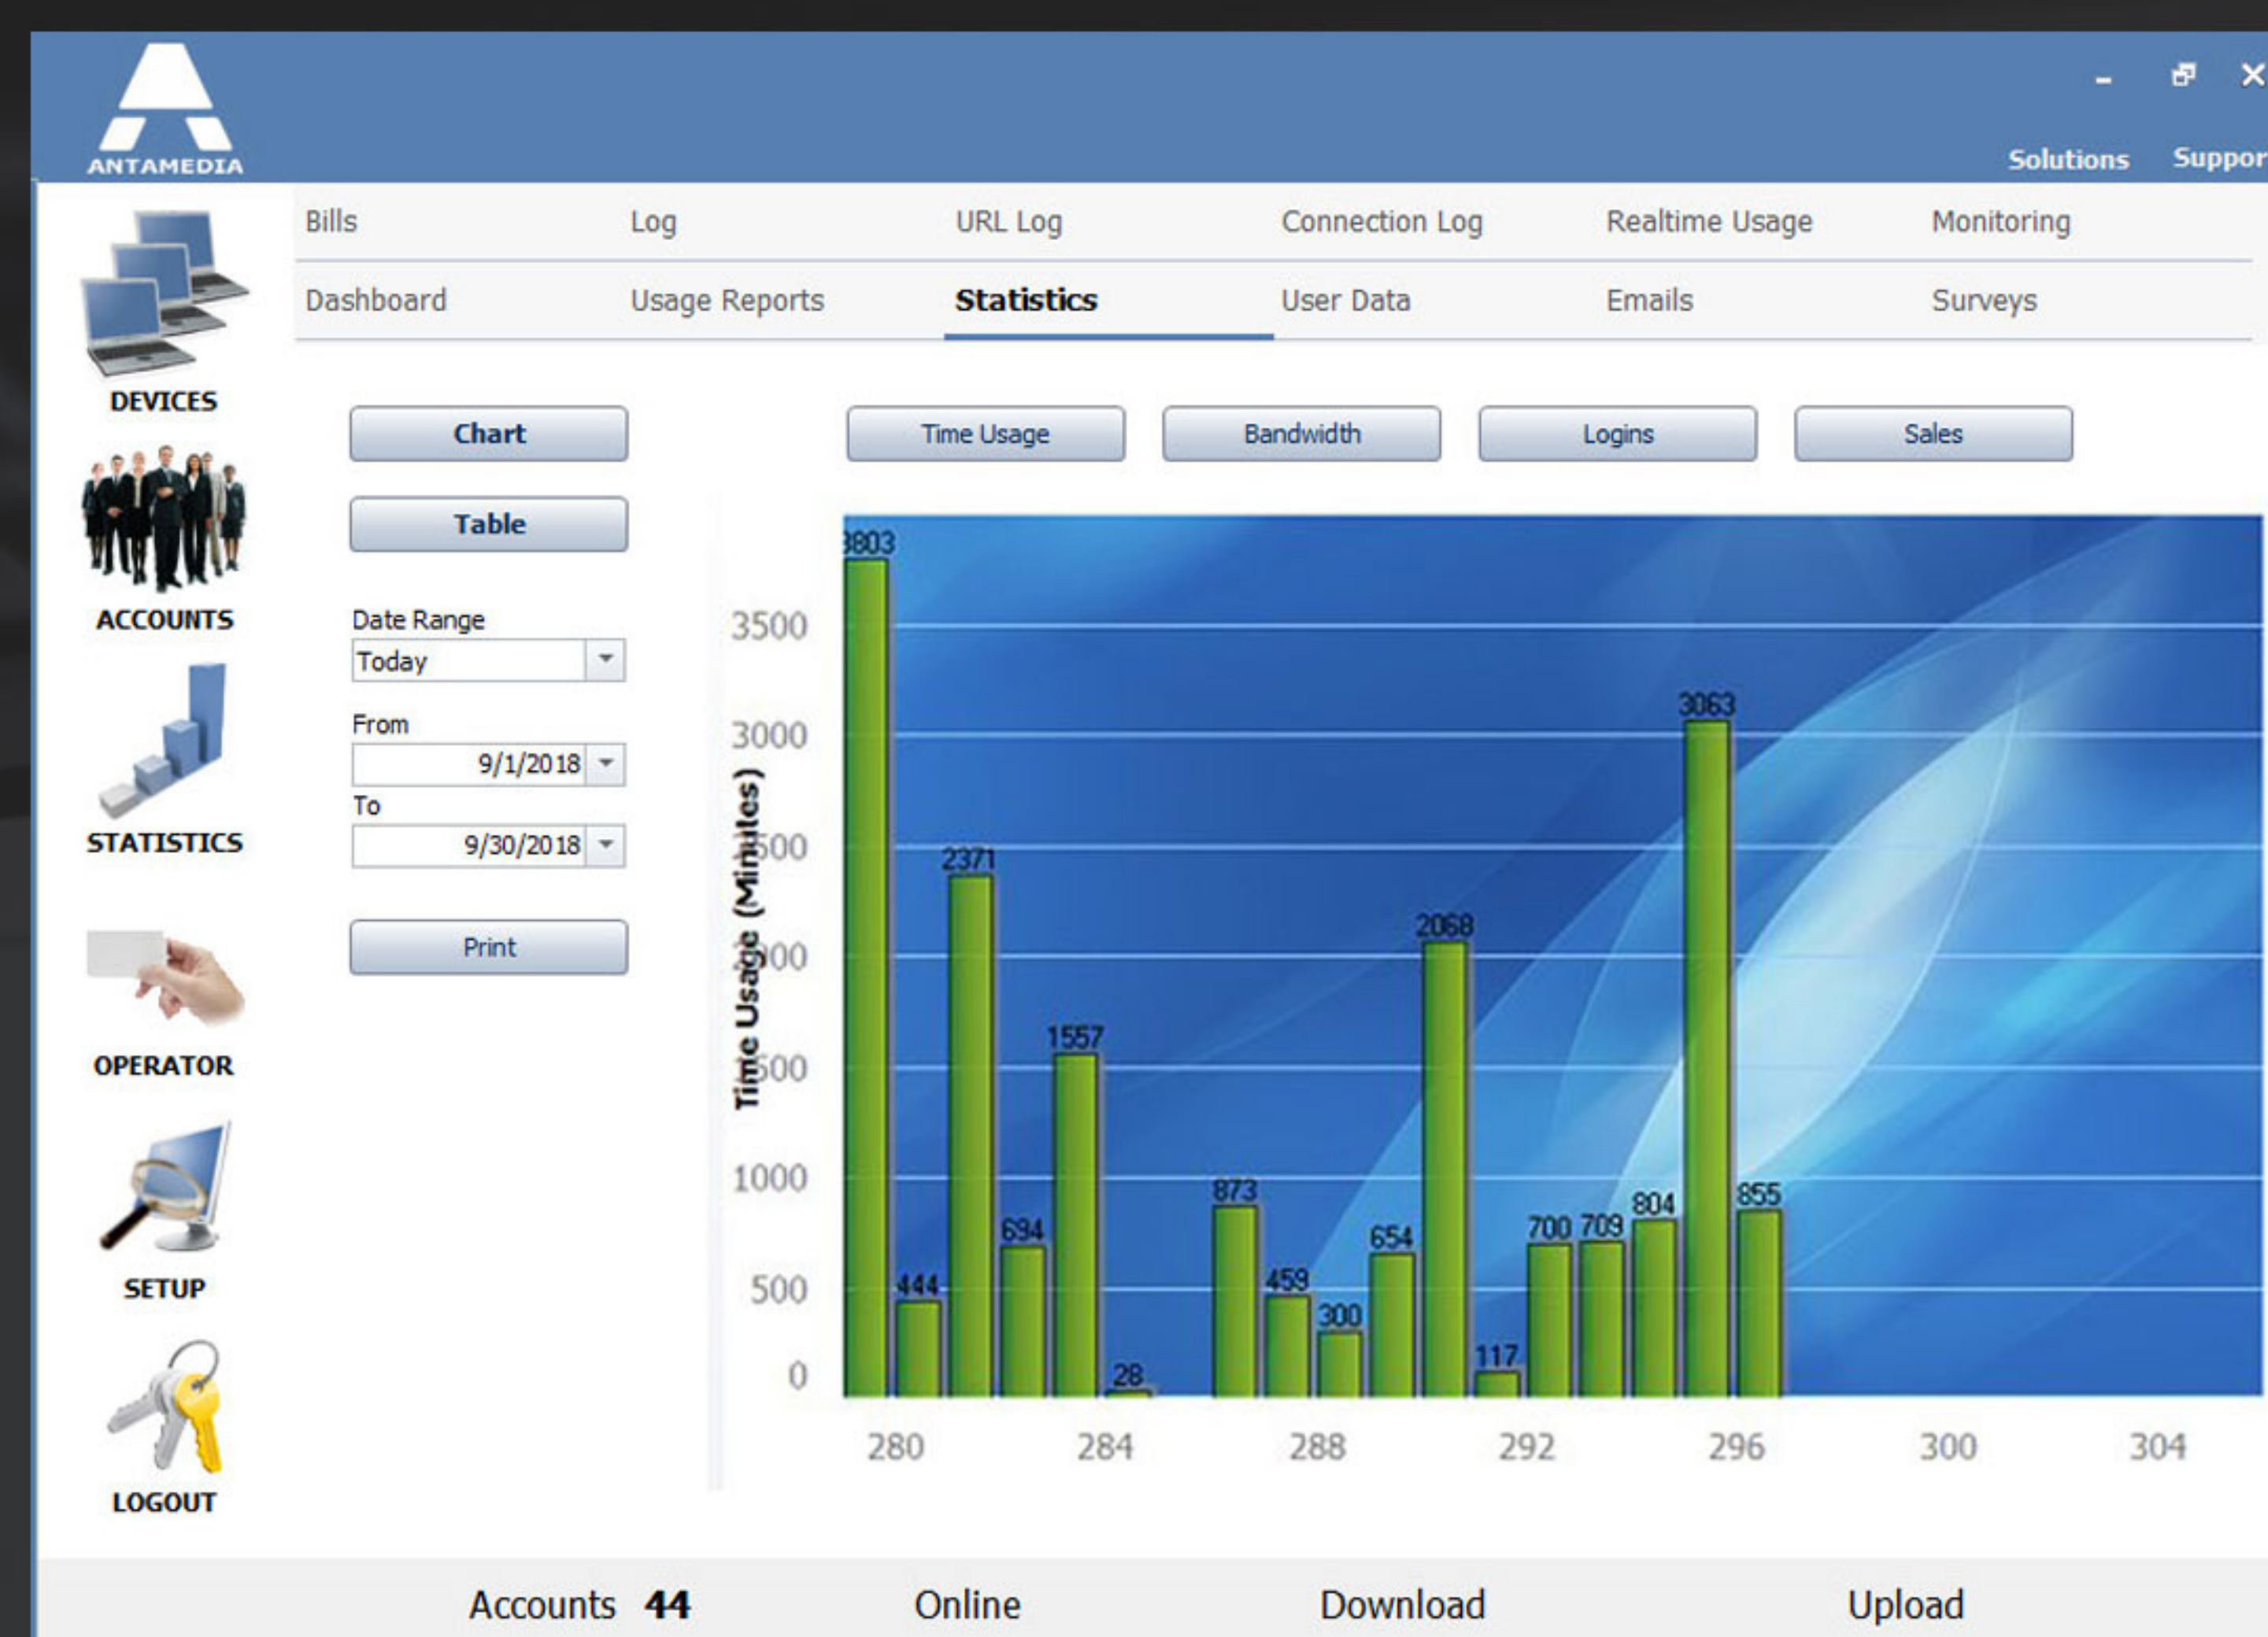

STATISTICS

Ranking from basic data to advanced analytics, HotSpot Hotel WiFi software offers a thorough insight into visitors behaviour.

Know all your hotspots statistics: who is using it, how long, the number of logins per day, total time usage, bandwidth consumed.

HotSpot activity log stores actions performed by employees or customers, including sales, session start and stop, the time of incorrect login attempts etc.

You can filter the database by date, action, username, computer IP or MAC address.

ABOUT US

Antamedia software company has been developing software solutions and specialized solutions for both small and middle-sized businesses since 2001.

We initially helped entrepreneurs realize their goals and start their own businesses, and nowadays we give support to our biggest business clients as well.

Antamedia was a pioneer in WiFi software business in 2006 and since then we have expanded the list of solutions for WiFi control with Android and Cloud innovative solutions.

HotSpot Hotel WiFi software is a next-generation intelligent system which improves WiFi network and boosts customer satisfaction.
