ANTAMEDIA INTERNET CAFE

INTERNET CAFE

Antamedia Internet Cafe is a client/server software that secures public Internet computers, kiosks, self-service devices, controls WiFi HotSpot laptops and mobile devices, provides POS facilities and much more.

Your public computers are protected with the Client Login screen, while the HotSpot module shows the login screen in the user's browser.

Customers are prompted to enter valid username and password to get Internet access or to start playing games or using programs.

After successful login, your customer will see the remaining time and bandwidth quota, expiration date, and other relevant info.

ANTAMEDIA

Antamedia Internet Cafe software controls, secures, and enhances the running of your Internet cafe, gaming center, eSports center, library, school or hotel public computers.

The software restricts access to the system, desktop, drives, folders and programs based on your settings.

It helps you control and bill your customers for the Internet browsing, playing games, using Office applications, even covering retail products.

Internet Cafe keeps track of customer account and shows a warning message when the account is due to expire, helping a customer to refill the account and continue using your service without interruption.

Internet Cafe Software includes application, billing, statistics and reporting with many useful features. The system is scalable with a fully integrated database system that will grow with your system.

Internet Cafe software is created with your needs and concerns in mind. It easily scale from a little Cyber Cafe shop to a major eSports center chain with the same simple interface.

Configure games available to customers, easily control Internet use, create complex price plans, maintain customer accounts and get robust reports on game statistics, billing, usage, bandwidth, URL logs. It supports wired and wireless connections and it's hardware independent.

Tight control of your employees, POS system that bills additional services, accept credit cards and offer automatic payment and signup.

Various reports provides instant access to statistics, current stock.

Save your time, money and effort !

A great profit booster for your Internet Cafe or Gaming Center can be a WiFi network.

Many people use their mobile devices (smartphones, tablets, laptops) for an everyday job or on vacation to stay in touch with their family and friends.

Even in non-working hours of your primary business, your customers will be able to use your WiFi services and generate profit.

Best of all, it's automated, there is no maintenance fee for computers, licenses for software and OS.

The HotSpot module integrated into Antamedia Internet Cafe allows you to control and bill your customers for the Internet usage without installing any client software.

Provide Internet services in your Hotel, Park, Coffee Shop or Restaurant.

Offering high-speed Internet services in your establishment can only help to increase value add to trade, repeat business and client satisfaction.

With the use of Antamedia Internet Cafe software you will be able to:

• Add to sales (coffee, food, IT consumables, and services e.g. printing)

• Provide reliable Internet and application services to conference rooms

• Control and monitor access to the Internet for all computers, both wired and wireless in your guest rooms.

• Provide roaming Internet resources to the grounds around your establishment for example on a golf course for email, scorekeeping or around a pool.

ANTAMEDIA

ABOUT US

Antamedia has been developing software and specialized solutions for both small and middle-sized businesses since 2001.

We initially helped entrepreneurs realize their goals and start their own businesses, and today we are proud to retain that ethos of personal customer care for even our largest corporate clients.

Regardless of whether you are seeking a software solution for a massive project such as a major hotel chain, a medium sized hospital or your own little cybercafe on the corner, you will find our software was built with your needs and concerns in mind.

All Antamedia software solutions work independently and can be centralized, scaling to international branching with the same simple interface. This avoids the cost of training staff, constant upgrades and incompatibility issues.
